

UNDERGROUND STORAGE TANK SYSTEM AFFIRMATIVE STATEMENT OF COMPATIBILITY

*For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 23 California Code of Regulations §2631(j)*

Unified Program Agency Use Only

This document must be completed and submitted to your local UST Program Unified Program Agency prior to storing Biodiesel or E85 in an underground storage tank (UST) system. If you store alternative fuel in more than one UST, you must submit a separate form for each tank. For additional information, refer to the Unidocs [Underground Storage Tank System Compatibility With Alternative Fuels](http://www.unidocs.org) available at **www.unidocs.org**.

I. Facility and Tank Information

Facility Name: _____ Bldg. No.: _____

Site Address: _____ City: _____ Contact Name: _____

Phone No.: () _____ ext. _____ eMail: _____

Tank ID #: _____ Capacity (gal.): _____ Product Stored: B20; B100; E85; Other (specify) _____

II. Tank System Compatibility

The California State Water Resources Control Board (SWRCB) maintains a list of UST system components whose manufacturers have demonstrated compatibility with alternative fuels. The list is available at **www.waterboards.ca.gov/water_issues/programs/ust/alt_comp_opt/soc.shtml**. In the table below, provide the requested information for each component. If you unable to check one of the three boxes in the last column for any component, you must apply for a permit from the local UST Program Unified Program Agency and retrofit the tank system with approved components or cease the storage of alternative fuel in the UST system.

III. Leak Detection Equipment Compatibility

Underground Storage Tank leak detection equipment and methods that are approved for use in California are listed in the SWRCB's Local Guidance Letter 113 (LG 113), available at www.waterboards.ca.gov/water_issues/programs/ust/leak_prevention/lgs. Leak detection equipment approved for use with E85 storage is available at www.waterboards.ca.gov/water_issues/programs/ust/leak_prevention/lg113/misc/e85veeder.shtml. Leak detection equipment approved for use with Biodiesel storage is available at www.waterboards.ca.gov/water_issues/programs/ust/leak_prevention/lg113/misc/biodiesel_eq.shtml.

In the table below, provide the requested information for each leak detection monitoring component. If you check any "No" box in the last column, you must either attach an Affirmative Statement of Compatibility from the manufacturer of that component, or apply for a permit from the UST Program Unified Program Agency to retrofit the tank system with approved components, or cease the storage of alternative fuel in the UST system.

Manufacturer Name	Model or Part Number	Is This Component Listed As Compatible in LG 113, Or Approved By the SWRCB as Acceptable For Use With the Product Stored?
